AVIATION | TACTICAL | RESOURCES

COMPANY PROFILE

Established in 1997, Sisley Clothing Australia started as a home-business with the ten years prior experience brought by Matt Sisley as a pattern maker for a local men's suit manufacturer. Based in Newcastle, the operation now has a valued team of staff from administration, to cutting, machining and embroidery helping to bring "Intelligent Protection" to the aviation, resource, and tactical sectors. Honoured to be producing onshore, our company is proud to be an Australian made & owned business, accredited through Ethical Clothing Australia. Being ISO certified (ISO9001:2015) as a manufacturer of flight suits, Hi-Vis and hazard-protection workwear provides our end users that extra assurance of quality systems.

Australasia's leading custom-made flight suit manufacturer, Sisley Clothing Australia's protective garments are in strong demand from the aviation industry and are a well-recognised and trusted brand. We give our customers the choice of creating their own style, colour, and branding requirements, unmatched by any other provider. With an extensive range of colours and weights in Nomex® material and optional components, Sisley's manufacturing is all done in-house at its Newcastle factory. Choosing only the best suppliers of Nomex® Fabric, Nomex® YKK Zippers, Fire Retardant Hook & Loop, Nomex® Thread, and Fire Retardant Reflective Tapes allows Sisley Clothing to stand by our outstanding products, this is backed up by a twelve-month conditional warranty on our manufactured range.

Sisley's main customer base is aeromedical, and extends across fire bombing, oil and gas, mustering and marine transfer pilots, police airwings, search and rescue, and other government agencies. With no minimum orders, we are happy to produce for the individual pilot or small crew. Sizing kits are also available to best assist with fitting.

Sisley maintains a database of records to allow personnel to refer to historical sizing and styling for future ordering. Orders can be expedited for anyone with urgent requirements, simply by adding an urgent-order surcharge.

Sisley Clothing Australia is the Australian distributor for Evolution Helmets, commonly known as EVO, which matches their branding with customisation – allowing customers to pick and choose from a wide range of colours and configurations. Helmets are a special order item, but parts are stocked and refurbishment services are available. EVO helmets meet approval from the DOI (Department of Interior) specifications in the U.S.A. Made in Melbourne, Florida, the Evolution Helmets represent great value. Choose to compliment your helmet with any configuration you want—EVO has you covered.

Like any good business, Sisley's back bone comes from the people that work 'in the engine', right through to the end customer relationships. A continuous trend for reinvesting in the business with new machinery, technology and training has got Sisley to where it is today and keeps us moving in the right direction.

NOMEX® IIIA FABRICS

93% Nomex®, 5% Kevlar, 2% Carbon Fibre

Nomex® IIIA, Nomex® FR Lenzing and Tecasafe Plus 700-A fabrics are inherently flame resistant and will never melt. The fabric will protect the wearer from heat and flame of a flash fire. It also provides valuable seconds of protection for escape and minimising the potential for burn injury.

FR THERMAL LINING

Nomex® Quilted Lining: Layer 1:100% Nomex® IIIA; Layer 2/3: Spunlace

Power Grid®: 68% FR Modacrylic, 29% Lyocell, 3% Spandex

The key function of our thermal lining fabrics is to sustain warmth within a cooler environment yet offer more safety by reducing the heat transfer from a fire environment to the wearer. Providing great insulation properties for the wearer, Nomex® thermal liners are among the thinnest, most flexible, most breathable components on the market.

TWO PIECE FLIGHT SUIT

Nomex® Trousers and Jackets are made to order with your choice of fabric colour and weight from the many options available (pages 4 & 5). Understanding the needs of aviators, the style is made with the standard features listed below, using fabric that is “no melt, no drip” for the life of the garment.

Standard Jacket Features

- Available in all fabrics.
- Open ended Nomex® zipper front with inside flap.
- Action pleated back - for movement ease.
- Shirt style collar.
- 2 x Nomex® zipper slanting chest pockets.
- Left sleeve pocket with Nomex® zipper & pen/torch pocket with flap.
- Hook & Loop sleeve cuff tabs.
- Hook & Loop on left chest for badge (5 x 10cm).

Standard Trouser Features

- Available in all fabrics.
- 5cm belt loops.
- Fob pocket (coin pocket).
- Adjustable waist with multi-fit buckles.
- 1 x right hip flap pocket with button.
- 2 x front trouser pockets.
- 2 x Nomex® zipper thigh pockets (both horizontal zippers).
- 2 x Nomex® zipper bellow cuff pockets.
- 2 x Nomex® zipper cuff closures (to make entry fast and easy).

Refer to page 8 for a wide range of additional extras available to create that extra tailored functionality for the end-user.

Refer to pages 10, 11, 16 & 17 for reflective tape options, heat transfers, embroidery and badging that can be added on request – these are available as standard options or customized with logos to help teams achieve their corporate look.

Maternity trouser design also available.

Multi-fit Waist Buckle.

Take a closer look at the range of options available.

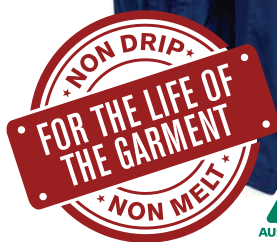

HOW TO ORDER

Orders can be placed directly over our website or emailed through. We will send you a garment style confirmation for your approval and keep this on file for future.

All our manufactured items can be made to a standard size or made-to-measure for a personal fit. Measuring instructions and measurement forms are available on our website for you to email to our friendly team.

For further information and to place orders, visit www.sisleyclothing.com.au
